Laser Toner & Ink Jet Cartridges

U-M Waste Management Services is no longer able to collect inkjet and toner cartridges from campus buildings.

To recycle your cartridges, contact Mikan Corporation, U-M's strategic supplier for remanufactured cartridges. They will provide collections boxes and will pick them up from your building when filled. Contact information can be found on the U-M Procurement website.

Did you know? Laser Toner Cartridges are used mostly in laser printers and photocopiers, while Ink Jet Cartridges are used in ink jet printers or "bubble jet" printers.

Looking to recycle at home? To find a location to recycle these items at home, visit www.earth911.org.
